EDUCATION

Sri Sivasubramaniya Nadar College of Engineering

2024 – 2028

B.E. Computer Science and Engineering

CGPA: 9.01/10

- **Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Web Technologies, Operating Systems, Software Engineering

Srimathi Sundaravalli Memorial School

2024

12th Grade – Maths, Physics, Chemistry, Computer Science

GRADE: 97.4%

EXPERIENCE

Yuga Yatra Retail (OPC) Pvt.Ltd

May 2026 – July 2026

Software Engineer Intern

Bengaluru, India (Remote)

- Working on a SaaS-based matrimonial platform to develop and enhance scalable web application features for user and profile management workflows.
- Contributing to frontend and backend development using modern web technologies, APIs, and database-driven functionalities to support platform performance and usability.

SKILLS

Programming Languages: C, Java, Python, TypeScript

Web Development & Frameworks: HTML, CSS, ReactJS, Spring Boot, Tailwind CSS, Pygame

Databases & Developer Tools: MySQL, MongoDB, Git, GitHub, Postman, Unix Shell, IntelliJ IDEA, VS Code

PROJECTS

Retail Management System | *Java, Spring Boot, React, TypeScript, Tailwind CSS, MongoDB*

Apr 2026

- Developed a full-stack retail management system using a microservices architecture, with separate Spring Boot services for user and product management, RESTful APIs, and MongoDB for scalable data persistence.
- Built secure admin and customer modules featuring authentication, product and inventory management, and a responsive React frontend for category-based product browsing with real-time API integration.

Personal Finance Management System | *Java, JDBC, MySQL*

Mar 2026

- Developed a backend system for managing personal finances, enabling users to record income and expenses across multiple accounts with reliable balance updates and transactional processing.
- Implemented budget tracking and reporting features, including category-wise spending summaries, monthly expense trends, and transaction history using JDBC and MySQL for efficient data persistence and querying.

Word Scramble Game | *Python, Pygame*

Dec 2024

- Developed an interactive word scramble game using Python and Pygame, implementing randomized word generation, real-time input handling, and dynamic scoring mechanisms.
- Designed gameplay features including difficulty progression, hint systems, and audio feedback while applying event-driven programming and game loop design concepts.

ACHIEVEMENTS

- Solved **350+** problems on **LeetCode** (**Max Rating: 1647, Top 20% globally**) 
- Solved **700+** **Data Structures and Algorithms** problems across competitive programming and coding platforms including LeetCode and Codeforces 
- **Top 6 Global Ranking** in Smart India Hackathon 2025 – Waitlisted for National Finals 
- **Finalist – CP Potpourri 2026**, Shastra IIT Madras (**Top 1%**)
- **3rd Place** – National Level Mathematics Symposium (Infinity Relay) 

CERTIFICATIONS

- **Java Masterclass 2025** – Udemy 

Jan 25, 2026
